Infu-Surg®

Pressure Infusion Bag

The Infu-Surg® pressure infusion bag from Ethox International is a safe, high-quality and reliable product for intravenous & intra-arterial infusion treatment, plus A-line pressure monitoring. The Infu-Surg is designed for single patient use potentially preventing and controlling cross-contamination and hospital acquired infections. As Ethox's flagship product with millions sold worldwide, the Infu-Surg is a cost-effective, trusted product that medical professionals have relied on for decades.

Product Features

Safe

- Designed for single patient use
- Safety valve prevents over-inflation (330 mmHg pressure relief)
- Translucent front panel for proper label observation
- Latex free

Quality

- Maintains desired infusion pressure
- Color-coded gauge makes monitoring pressure simple (0-300 mmHg)
- 3-way stopcock ensures precise control of pressure
- Hook version provides for single hand operation

Reliable

- 100% tested
- Pressure relief valve protects bag from over-inflation
- Suitable for use with external inflation sources
- Loads quickly and easily
- Large, oval shaped bulb allows for quick and easy inflation of bladder
- No cleaning or repair time needed
