FL 101 Plus

FL 101 is a symmetric lamp especially suitable for work benches and other large work surfaces where plenty of light is needed. With its flexible arm and head you can easily adjust the lamp for your personal needs. FL 101 PLUS is supplied with HF ballast as standard.

The parallel motion feature of the spring balanced arm ensures that the shade remains horizontal to the work surface irrespective of the number of times the arm is moved. Supplied as standard with table bracket.
